**Patent Claim**

**I, Johnny Keith Endicott, of Endicott, Kentucky, mailing address, P.O. Box 214, Allen, Ky. 41601, claim that the John Endicott's Original Low- Carb Pizza, know as Prodigy Pizza, allows the consumer to enjoy the taste & texture of pizza without the intake of excessive carbohydrates that traditional flour base or crust pizza's offer. This is especially important for those on a low carbohydrate Lifestyle. Furthermore, since my pizza design does not use a flour base or crust, it is more enjoyable than traditional designs because it is totally sealed in cheese, which allows it to be less messy and retain all of its flavor and moisture inside. It is a unique design, unlike any other pizza on the market today.**
